

# CSV Training

according to GAMP® 5 in the 2<sup>nd</sup> Edition

Valicare CSV experts train your employees in the validation of computerized systems (CSV) according to GAMP® 5 in the 2<sup>nd</sup> edition to prepare for the digital transformation and implement it **innovatively** and **sustainably** in your company.

The CSV team provides basic CSV knowledge about compliance and validation in a regulated environment with all the necessary directives, norms, standards, and guidelines.

GAMP® 5 is considered an international guideline in the life science industries and has now been published in its 2<sup>nd</sup> Edition by the ISPE® (International Society for Pharmaceutical Engineering). The CSV team teaches your employees the complete System Development Life Cycle (SDLC) including iterative procedures and covers critical thinking, artificial intelligence / machine learning, and Pharma 4.0™.

## Our competence

- Extensive experience in CSV, the use of the GAMP® and the execution of CSV compliance training
- Decades of experiences in dealing with manifold IT applications
- Engineers and scientists as trainers with relevant theoretical and practical experience

## Our services & support

- Modular CSV training courses in presence and online
- The Valicare CSV Academy – the online training portal
- Individually customizable learning content
- Training on the job

## Your benefits

- Better understanding and practical relevance through company-specific training
- Efficient learning through flexible training times via the online portal
- Answers to all open questions by experts

## **Integration of suppliers**

Our CSV team will teach you how to effectively and efficiently integrate external service providers and subcontractors into your company. To follow the expectation by regulatory authorities and notified bodies of each respective country for a seamless working together.

## **CSV audits**

Our CSV team also provides training in the planning, execution, and documentation of CSV audits- This will enable you to carry out internal or external audits in your company yourself. Your employees will also be sensitized how to behave appropriately in audit situations, regardless of whether they participate directly in the audit, or meet the auditors on site at your company.

**Contact us if you are planning to train CSV, to integrate your suppliers, or to learn everything about audits and inspections. We will support you!**
